- 3/4 inch
- 5/8 inch
- 1/2 inch
- 3/8 inch
- 1/4 inch
- 1/8 inch

Measure the line below to test:
 if it is not exactly **6 inches long**,
 the scale is wrong.

Be sure your printer's "scaling" setting is set to "100% scale" or "no scaling."

Corner Radius Guide Instructions

PioneerTablePads.com

1. Measure the test line at the bottom of page 1 to make sure the scale of the printout is accurate.

2. Cut out the radius you think is closest to your table's corners.

3. Compare that radius to the flat top surface only. Do not include any lip, bevel, rolled or sloping edges:

4. If the radius is too small or too large, try a different one. (If none of these sizes is correct, you can make a pattern instead. See instructions on our website.)

5. Give us the correct radius.
